

Female Reproductions Issues

PREGNANCY FORMULA

This combines key remedies to help ensure a normal pregnancy and delivery. Caulophyllum 30c, Arnica 30x, and Sepia 30c; these proven remedies are recommended by leading holistic veterinarians throughout the world to be given during gestation. Marina Zacharias says, "All my girls receive this along with the NR Birth Aid without fail!" When Pregnancy Formula is given after whelping it will aid in preventing infection; uterine prolapse; and general pain.

DOSAGE: Give 1/2 to 1 dropper full once a week from the time of mating; also give once daily during the last four days of pregnancy. After Birth: Give three times daily for five days. Give away from food.

URTICA URENS 30x

Urtica Urens is a plant that is also known as Dwarf Nettle or Small Nettle". After birthing, if the bitch's milk production does not get going, or is slow to come in, this remedy will help to stimulate it.

DOSAGE: Give 1/2 to 1 dropper full. If necessary repeat every 4 hours until milk flows.

CAULOPHYLLUM 1m

This dependable high potency remedy can be used when there is difficulty during labour or uterine inertia. Caulophyllum is a plant that is also known as "Blue Cohosh". It helps to revive labour contractions and can be used in place of Pituitrin injections. It can also be given after whelping to release retained afterbirths. It is also useful in promoting drainage in open pyometra. This is a remedy to have on hand just in case!

DOSAGE: Give 1/2 to 1 dropper full every 15 minutes for up to four doses. As long as results are achieved continue as needed. (If no result, seek Veterinary assistance.)

VIBURNAM OPULIS 30c

Viburnum Opulus is also known as Guelder-Rose. The dried bark is used in a tincture, known as "Cramp Bark," to alleviate painful menstrual cramps. For animals that have shown a history of miscarriages or reabsorption problems.

DOSAGE: Give 1/2 to 1 full dropper twice a week during the first month of pregnancy. Then give once a week during the second month of pregnancy.

MASTITIS REMEDY

This is an effective homeopathic formula to prevent mastitis. Can be given at first signs of milk and continued until threat has passed. Good for nursing mothers (will not dry up milk) and false pregnancies. It can be given during acute mastitis symptoms too, along with Traumeel; Inflammation; Apis Homaccord and Bryaconeel.

DOSAGE: 1/2 to 1 full dropper twice daily, or hourly in crises.

Symplex-F

Combines Ovary, Adrenal, Pituitary and Thyroid. This glandular helps give balance to entire female function. Use as nutritional support for females that cycle irregularly or have no cycles; infertility problems; habitual abortions and general reproductive or genital conditions.

DOSAGE:

Under 25 lb. - 1 tab daily
25 to 50 lb. 2- 3 tabs daily
50 to 100lb. 4 tabs daily
100+ lbs. 4 - 6 tabs daily

Hormeel

This is a homeopathic combination that aids in regulating and balancing the female reproductive cycle. Clinically, it has given good success when combined with Symplex F to help fertility when given a couple months prior to breeding. It aids irregular heat cycles and when given throughout pregnancy, helps ensure a good gestation to term; especially important for those bitches with a history of problem pregnancies, absorption or fertility problems.

DOSAGE:

Small - 7-10 drops twice a day
Medium - 10-12 drops twice a day
Large - 15 drops twice a day

Glyco-Flex (Green Lipped Mussel)

By Vetri-Science

Glyco-Flex for dogs is a nutritional supplement to support proper joint and connective tissue functions.* Made from pure freeze-dried perna canaliculus (green-lipped Mussel from New Zealand*. Perna Mussels are a good source of protein, minerals and chondroitin sulfates.

Glyco-Flex is produced by freeze-drying the entire mussel (excluding the shell* of the Perna Mussel from New Zealand. A process called lyophilization removes water from the isolated raw mussel under vacuum and at low temperatures, thereby maintaining the integrity and stability of the ingredients in the organism.

It has been anecdotally reported that this product increases the number of ova released and results in larger litter sizes. Recommended Dosages to affect his 'off label use':

300mg (GF300) AM and PM for small to medium bitches
600mg (GF600) AM and PM for medium to large bitches
